

Improvement in shelf paper, both material and design, has been surprisingly slow in view of the fact that kitchens' linen and china cupboards are so important in the home. Wrapping paper, newspaper and plain white paper have had their day in decorating the shelves, and now a new idea originates in New York that offers several innovations. Not only is a selection of bright colors available, but a patented edge which prevents curling, is the latest thing. A varied assortment of patterns has been designed by interior decorators to harmonize with most any setting.

If you know of some novel idea, actually being worked, help spread the news by sending full details to Ed Bishop, care of this newspaper. Further information on any idea published here will be given to anyone enclosing a self-addressed, stamped envelope.
