BURWASH, Eng.—(U.P.)—Batemans, the lovely 18th century home of Rudyard Kipling, will become a national memorial. Mrs. Kipling always wished their home to be a national memorial. She preserved and cared for it to the last for that purpose. Little was known of Mrs. Kipling for she was shy, retiring, disliked publicity of any kind. They were married when Kipling was 28 and lived in a little bungalow in America where he finished "Many Inventions" and began "The Jungle Book." In these early days, she was his secretary, banker, business agent, and farm superintendent and even his sentry against those who would invade his much loved privacy.

FRIAR'S STORY LED TO CORONADO'S JOURNEY. This year people are taking special note of something which happened 400 years ago—the journey of Coronado. The trip lasted two years, but people are celebrating the year it began—1540. At that time the New World was not well known. Columbus had crossed the Atlantic and Cortez had conquered Mexico, but no white man had seen the Mississippi. Almost nothing was known about the land west of the great river. The party made its way up along the western side of Mexico until it entered land now inside the United States. The entry was made at a point not a great distance from the border between Arizona and New Mexico. In those days there was no such country as the United States. The Spaniards called the region "Cibola." The trip was mainly a search for the "seven golden cities." The men grew excited when they came in sight of an Indian settlement. They hurried to it, their eyes wide open for gold. No gold was found, however. There was not even any silver in the place, so far as could be learned. One good thing the city did supply, and that was food. Hungry after the long journey, the Spaniards enjoyed a feast. After resting in the village, they gathered up loads of corn to take with them while they were trying to reach the next settlement. They hoped to find a much richer place within a few days. Uncle Ray
