Feed Crop **Drop Seen** by Ebling Walter H. Ebling, statistician

for the State Department of Agriculture, predicted today that Wisconsin's 1946 feed crop production would drop below 1945: total. The decline is blamed par-

tially on smaller acreages and inadequate rainfall during May and June, Ebling said, and is particularly evident in tame hay, corn and oats. Ebling estimated that the state's

corn crop would be about \$190-500,000 bushels, nearly as large as the 1945 total and almost one fourth above the 1935-44 average. The oat crop is expected to total 123,750,000 bushels, Ebling said, or about 15 per cent below the 1945 crop and 50 per cent above average.

above average.

Tame hay is expected to reach 5,750,000 tons as compared to the record 7,500,000 tons harvested last year. The extimated 1946 total is 75 per cent of the 1945 crop and nine per cent below average.

Lots Eight (8) to Nineteen (18), inclusive, of Block Two (2), Shepard Park; Lots One (1) to Six (6), inclusive, of Block Three (2). This ordinance shall be in effect from and after its passage and total is 75 per cent of the 1945 the provisions of Section 16.19 of the General Ordinances of the City of Madison.

A. W. BAREIS

However, prospects for barley and spring wheat are "much above 1945," Ebling said. Rye

and winter wheat production will drop below the 1945 harvest, Classified he predicted.

Ebling said that production of Advertising

than double the 1945 total and exceed the average. The tobacco crop is estimated at 42,000,000 State Journal and the Capital Times. Single Journal rates on application. Count 5 6-letter words to the line, wear's harvest. Potatoes show a decline of about 12 per cent from last year with an expected words production of less than 11,000,000 pounds.
