By HASKIN

Q. HOW MANY adult persons in the United States have never been to school or received formal education? P. M. T.

A. In 1940 there were 10 million adult persons, or approxi-mately one out of 7, who were classed as functionally illiterate, that is, they had not advanced beyond the fourth grade. Nearly three million of these had never attended school. Broken down, the functionally illiterate included over four million native whites, over three million foreign-born whites and nearly three million Negroes.

Answer to Question No. 2 No. Biologist S. J. Holmes has shown that extreme idiots are

shown that extreme idiots are as likely to come from families on the Avenue as those in the slums. However, high grade morons and borderline cases are more frequently found to come from the lower levels. Prof. Holmes thinks part of this is an arrival to the them. probably due to the fact that these persons tend to marry each other and rear families—while absolute imbedies do not marry. The children of morons, therefore, tend to have low abil-ity like the parents. This keeps them in the lower economic and
